

I am currently watching the senate hearing on media monopoly on c-span. I am concerned with the cavalier attitude of the media heads and their concerned only for the money that they will make and not the concern for the American people, who OWN the airwaves.

We allow media companies to use the airwaves in exchange for their assurance that they're serving the public interest, and it's the FCC's job to make sure that's so. Please live up to your mandate and oppose the rule change.
